

Ann D. Murtlow – President & CEO Indianapolis Power & Light Company

Ann D. Murtlow is President and Chief Executive Officer of Indianapolis Power & Light Company (IPL). Indianapolis Power & Light Company is an integrated, regulated public utility serving approximately 470,000 retail customers in and around Indianapolis, Indiana. Ms. Murtlow also serves as Vice President of IPL's parent company, AES Corporation.

Ann began her career as an engineer with Bechtel Power Corporation, one of the world's leading engineering and construction firms. After five years, she was recruited to AES Corporation headquarters in Arlington, Virginia to lead the environmental permitting activities for new power stations in the U.S. and abroad. Her career progressed into other areas of project and development, including commercial negotiations for engineering, procurement and construction services, fuel supply and transportation and non-recourse and multi-lateral project finance. In 1995, she successfully led the 180-MW, \$400M AES Warrior Run Project to financial closing.

In 1997, Ann moved to AES' regional office in London, England; first as Senior Project Director responsible for business development in Europe and Africa, and then as the AES officer responsible for business development and operations in 22 Northern and Central European countries. During this time, she also served as the liaison to the AES Board of Directors on environmental issues.

In 2002, Ann was named President and Chief Executive Officer of IPL where she is focused on providing value to company stakeholders through operating excellence in the areas of safety, environmental performance, reliability, customer service, financial performance, employee engagement and community leadership. She is also the executive sponsor for AES' environmental, safety, and security networks across North America.

Ann received her Bachelor of Science degree in Chemical Engineering from Lehigh University in 1982.

Ann's affiliations include the following:

- Central Indiana Corporate Partnership – Board of Directors
- Greater Indianapolis Chamber of Commerce—Board of Directors
- Federal Reserve Bank of Chicago – Board of Directors
- Walker Information – Board of Advisors

- Central Indiana Community Foundation – Board of Directors
- Women’s Fund of Central Indiana – Chair, Executive Committee, Board of Directors
- Indianapolis Zoological Society – Executive Committee, Board of Directors
- The Mind Trust – Board of Directors
- Young Presidents Organization (YPO)
- Herff Jones, Board of Directors
- AEGIS, Board of Directors

About IPL

IPL is a vertically integrated, regulated public utility providing retail electric service to approximately 470,000 customers in Indianapolis and the surrounding counties.

Electric service began in Indianapolis in the 1880's, pioneered by the predecessors to IPL. Two of those entities, Indianapolis Light and Heat Company and Merchant's Heat and Light Company, merged into the newly-incorporated Indianapolis Power & Light Company (IPL) in October, 1926. At that time, the company had a total of 105,000 customers. IPL now provides retail electric service to more than 470,000 residential, commercial and industrial customers in Indianapolis, as well as in portions of other Central Indiana communities surrounding Marion County.

As its communities have grown, so has IPL, which now owns and operates three primarily coal-fired generating plants and separate gas-fired combustion turbines to generate approximately 3,400 MW of power. The company's service territory now covers 528 square miles. The company employs approximately 1500 people.

IPL is located at One Monument Circle, Indianapolis, IN 46204. Additional information can be obtained by visiting www.iplpower.com.

About AES

AES is one of the world's largest power companies. AES owns and operates a diverse and growing portfolio in 29 countries including 132 power generation facilities and 14 utility distribution companies with the capacity to serve 100 million people worldwide. Its power plants encompass a broad range of technologies and fuel types, from coal to gas to renewable energy sources such as wind, hydro and biomass. Its utilities power major cities, from São Paulo, Brazil to Indianapolis, Indiana to Douala, Cameroon. Beyond power, the company also has subsidiaries which mine coal, turn seawater into drinking water, and are committing significant resources to alternative sources of energy to ensure a sustainable future. AES is also building a climate change business, to develop projects that offset greenhouse gas emissions and produce emissions offset credits.

AES brings the combined expertise of a global force of 25,000 people to each of its businesses. Sharing knowledge among that network is a core component of the way AES does business.

AES is headquartered in Arlington, Virginia. Additional information can be obtained by visiting our website at www.aes.com.
